

HOW MUCH COULD CLOGGED GUTTERS BE COSTING YOU?

Blocked downpipes are one of the biggest hidden causes of overflowing gutters, water damage and damp walls in Aussie homes. Flowmate is the smart insert that tackles the problem at the source — stopping clogs before they start.

No mesh. No screws. No tradie. Just pop it in and let the water flow.

Forget fiddly fixes that cause more headaches than they solve.

Flowmate is:

- ✓ Designed to protect downpipes — not just cover your gutters
- ✓ Easy to install and remove — no tools, no hassle
- ✓ Tough on leaves, twigs and even the odd cricket ball
- ✓ Built for Australian roofs, trees and weather
- ✓ A simple solution to an expensive problem

DESIGNED AND ENGINEERED IN AUSTRALIA

G'day Mates!

"For years, gutter guards have caused more headaches than solutions. As an industry veteran, I knew we could do better, so I teamed up with a couple of engineers here in Australia to create Flowmate. This innovative device ensures continuous water flow and prevents clogs without the hassle of outdated guards. Designed to withstand our Aussie climate, Flowmate is the future of gutter protection."

PREVENT DOWNPIPE BLOCKAGES

Protect your home against costly repairs

**Ensure rainwater continues
to flow smoothly**

Not Gutter Guard - Downpipe protection!

Helps to Prevent :

- Stagnant Water
- Mosquito Breeding
- Roof Decay
- Dry Rot
- Overflowing Water

AIV Australian
Industrial Vacuum

1. Count your house's downpipes

2. Buy a Flowmate for each downpipe

3. Install a Flowmate at each downpipe, either by yourself or a professional

The design is very simple and so easy to install. Everyone should invest in this.

2-STEP EASY INSTALLATION

Scan the QR code for installation tips, including solutions for gutter brackets or clips that might obstruct installation.

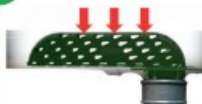

1

Attach Plate

Position the plate so it fully covers the downpipe opening.

2

Install Flowmate

Slide the Flowmate into the gutter and securely snap it onto the plate.

Downpipe Size

Flowmate's dropper is 70mm x 40mm. Fits both round and rectangular downpipes.

Maintenance

- Flowmate will keep the water flowing but doesn't replace regular gutter cleaning.
- Generally you should clean gutters once or twice a year depending on situation.

Aerodynamic Shape to Encourage Flow

Patented Design

Optimised Perforation

Stainless Steel Weight to Help Keep in Place

Customizable Plate That Fits all Aus/NZ Downpipes
